**SAFELY RESUMING SERVICES**

The health and safety of our patients and employees continues to be our highest priority.

During our phased approach we will continue to:

- Encourage use of telehealth visits.
- Continue visitor restrictions at all facilities.
- Screen all employees, patients, and essential visitors.
- Mask all staff, patients, and visitors.
- Use appropriate PPE to protect our workforce.
- Separate patients with known or suspected COVID-19 in designated areas.
- Social distance within the facilities.
- Ensure thorough cleaning and disinfection within the facilities.

### PHASE 1
- Some in-person office visits with telehealth visits still utilized for high risk patients.
- Minor office procedures utilizing local anesthesia.
- CT, MRI, and some additional diagnostic imaging procedures.

### PHASE 2
- Slowly introduce more outpatient operative procedures (hernia repair, arthroscopic surgery for example), some operative procedures with short hospital stays (joint replacement for example).
- Introduce a few more complex operative procedures requiring longer hospital stays, but which need to be done in a timely fashion (bypass surgery, cancer operations for example).
- Continually evaluate ability to provide services based on safety, testing capabilities, hospital bed availability, staffing, and PPE supplies.

### PHASE 3
- Gradually increase services that may require longer hospital stays and greater resources (cancer operations, brain tumor surgery for example).
- Continually evaluate ability to provide services based on safety, testing capabilities, hospital bed availability, staffing, and PPE supplies.

### PHASE 4
- Return to standard operations.

KRH will continue to evaluate the COVID-19 situation as we phase in re-introducing services. Changes in pandemic conditions will determine at what pace we increase or decrease service offerings.
